## Introduction and explanation

This index was designed as a companion to the **Sierra Nevada** map published by **IMUS GEOGRAPHICS**. It can be downloaded in PDF format from [www.imusgeographics.com](http://www.imusgeographics.com). Copies of the map can be purchased through the web site, or inquire with your favorite map retailer.

Over 3,100 place names were each classified and assigned a three character grid reference corresponding to its approximate location on the map.

These locations are expressed as **column / row / sub-quadrant**.

Example: The map location of Reno is C2a. So, Reno is found in the northwest quadrant of column C, row 2.

(Note: There are no lines on the map indicating sub-quadrants.)
